Residential	\$1.70
Multifamily	\$2.22
Overnight Accommodations	\$2.22
Restaurant/Fast Food	\$2.66
Other Non-Residential	\$2.22

Volumetric charges for residential customers, including single family residences and multi-family residences, will be calculated based on the customer's average culinary water usage in November through January each year. The charge will be calculated by multiplying the winter average usage amount in gallons by the volumetric charge and adding it to the monthly base rate. That rate will be assessed each month and recalculated each successive year. New residential customers (single family and multi-family) will be assessed the base rate until a winter usage amount can be calculated.

Volumetric charges for all other customers, including overnight accommodations, restaurants, and other non-residential (i.e. commercial) customers will be calculated based on the customer's total culinary water usage measured in the month preceding the billing month. The charge will be calculated by multiplying the preceding month's water usage amounts in gallons by the volumetric charge and adding it to the monthly base rate.
